

Sublime Text Cheatsheet (Mac)

Version 1.1, updated May 20, 2013

General

⌘ + ⬆ + P Command Palette
⌘ + P Goto Anything
⌘ + R Goto Symbol
⌘ + N New File
⌘ + S Save File
⌘ + ⬆ + S Save File As
⌘ + ⇧ + S Save All
⌘ + O Open File
⌘ + W Close File
⌘ + ⬆ + T Reopen Closed File
⌘ + ⬆ + N New Window
⌘ + ⬆ + W Close Window
⌘ + K, ⌘ + B Show Sidebar
ctrl + ` Show Console
⌘ + ctrl + F Enter Full Screen
⌘ + ctrl + ⬆ + F Enter Distraction Free Mode

Moving/editing

⌘ + Z Undo
⌘ + ⬆ + Z Redo
⌘ + Y Repeat
⌘ + C Copy
ctrl + Y Yank (inserts the text that's on top of the kill ring)
⌘ + X Cut
⌘ + V Paste
⌘ + ⬆ + V Paste and Indent
⌘ + J Indent
⌘ + [Unindent
⌘ + ctrl + ⬆/⬇ Swap Line Up/Down
⌘ + ⬆ + D Duplicate Line
ctrl + ⬆ + K Delete (kill) Line
⌘ + J Join Lines
⌘ + / Toggle Comment
⌘ + ⇧ + / Toggle Block Comment
⌘ + ⬆ + ↵ Insert Line Before
⌘ + ↵ Insert Line After
⌘ + ⬅ Delete to Beginning of Line
ctrl + K Delete to End of Line
ctrl + A Move to Beginning of Line
ctrl + E Move to End of Line
ctrl + P (revious) Move Up
ctrl + F (orward) Move Right
ctrl + N (ext) Move Down
ctrl + B (ack) Move Left
ctrl + T Transpose (swap two characters or words; buggy behaviour)
⌘ + ⇧ + . Close Tag
ctrl + ⬆ + W Wrap Selection with Tag
⌘ + K, ⌘ + U Convert Selected Text to Uppercase
⌘ + K, ⌘ + L Convert Selected Text to Lowercase
⌘ + ⇧ + Q Wrap Paragraph at Ruler

F5 Sort Lines
F5 Sort Lines (Case Sensitive)
ctrl + G Goto Line
ctrl + M Jump to Matching Brackets (does not work with HTML/XML tags)
ctrl + L Scroll to Selection (centers the screen to cursor)
ctrl + ⇧ + ⬆/⬇ Scroll Line Up/Down
ctrl + Q Record Macro
ctrl + ⬆ + Q Playback Macro

Selection

⌘ + U Undo
⌘ + ⬆ + U Soft Redo
⌘ + ⬆ + L Split Selection Into Lines (inserts multiple cursors)
ctrl + ⬆ + ⬆/⬇ Add Previous/Next Line (inserts multiple cursors)
⌘ Single Selection (when there are multiple selections; exits to visual mode first if you are in insert mode)
⌘ + A Select All
⌘ + D Expand Selection to Word
⌘ + L Expand Selection to Line
⌘ + ⬆ + A Expand Selection to Tag (HTML/XML)
⌘ + ⬆ + □ Expand Selection to Scope
ctrl + ⬆ + M Expand Selection to Brackets
⌘ + ⬆ + J Expand Selection to Indentation

Search/replace

⌘ + F Find
⌘ + G Find Next
⌘ + ⬆ + G Find Previous
⌘ + I Incremental Find
⌘ + ⇧ + F Replace
⌘ + ⇧ + E Replace Next
⌘ + ⇧ + G Quick Find (searches for the word under the cursor)
⌘ + ctrl + G Quick Find All (selects all occurrences of the word under the cursor)
⌘ + E Use Selection for Find
⌘ + ⬆ + E Use Selection for Replace
⌘ + ⬆ + F Find in Files (all open files)
F4 Next Result (file search results)
⬆ + F4 Previous Result (file search results)

Folding

⌘ + ⇧ + [Fold (selection)
⌘ + ⇧ +] Unfold
⌘ + K, ⌘ + J Unfold All
⌘ + K, ⌘ + 1 Fold All
⌘ + K, ⌘ + 2-9 Fold Level 2-9
⌘ + K, ⌘ + T Fold Tag Attributes (HTML/XML)

Bookmarking

⌘ + K, ⌘ + □ Set Mark
⌘ + K, ⌘ + A Select to Mark
⌘ + K, ⌘ + W Delete to Mark

⌘ + K, ⌘ + X Swap with Mark
⌘ + K, ⌘ + G Clear to Mark
⌘ + F2 Toggle Bookmark
F2 Next Bookmark
⬆ + F2 Previous Bookmark
⌘ + ⬆ + F2 Clear Bookmarks

Miscellaneous

F6 Toggle Spell Check
ctrl + F6 Next Misspelling
ctrl + ⬆ + F6 Previous Misspelling
⌘ + B Build
ctrl + □ Show Completions
⌘ + ⇧ + T Special Characters

Vintage Mode

Most basic vim commands should work (command mode only obviously) and can be preceded with a count.

. Repeat
d, [count] (optional), [motion]/dd/[D] Delete motion (e.g. a word) or delete line or delete line to end
c, [count] (optional), [motion]/C Change motion or change until end of line (enters insert mode)
y, [count] (optional), [motion]/yy Yank motion or yank (copy) Line
p/[P] Paste yanked/deleted text after/before the cursor
0/[S] Move to the beginning/end of a line
g Most of [g]'s power is not implemented in Vintage Mode. You can use the basic combinations [gg] and [G] to move to the top/bottom of the file. [number], [gg] to move to that line. [ga] to display character encoding in the status bar.
a/[A] Append to cursor/line (enters insert mode)
i/[I] Insert before cursor/line (enters insert mode)
w/[W] Move forward a Word/WORD (WORDS are whitespace-separated words)
b/[B] Move backwards a Word/WORD
e/[E] Move to the end of a Word/WORD
f, [character]/[F], [character] Find (character) forward/backwards on the current line
r, [character] Replace character under cursor
t/[T] 'till (forward/backward) Used in combination with motions like [c] or [d]. For example, [d], [t], [{ deletes everything until the next { character (on the current line).
o/[O] Open line below/above (enters insert mode)
{/[}] Move to the beginning/end of a paragraph
s/[S] or [cc] Substitute character/line (enters insert mode)
H(igh)/M(id)/L(ow) Move cursor to the top/middle/bottom of the screen
J Join Lines
ZZ Close File
x Delete character under cursor
X Backspace
v/[V] Enters Visual Mode/Visual Line Mode
n/[N] Find next/previous occurrence of search
>, [>]/<, [<] Indent/Unindent
~ Swap Case
q, [character]/[@], [character] Record/play macro

Remapped commands

ctrl + **S** Show Sidebar
⌘ + **ctrl** + **M** Toggle Minimap
⌘ + **ctrl** + **K** Swap Line Up
⌘ + **ctrl** + **J** Swap Line Down
⌘ + **↑** + **K** Delete (kill) Line

Plug-ins

AdvancedNewFile

⌘ + **⌘** + **N** New file from file/project directory (you can autocomplete directories)
⌘ + **↑** + **⌘** + **N** New file from file/project directory (adds an `__init__.py` file to each directory created)

Alignment

⌘ + **ctrl** + **A** Aligns a multi-line selection to indentation or a "=" character

Alternative Autocompletion

remapped **ctrl** + **↑** + **H** Previous autocompletion
remapped **ctrl** + **↑** + **K** Next autocompletion

ColorPicker

⌘ + **↑** + **C** Pops up a color picker and, after picking a color, inserts a hexcode

DashDoc

ctrl + **H** Uses the current selection to search in Dash[1]

DocBlockr

/, *****, *****, **↩** or **/**, *****, **↩** Creates a comment block.
Provides type hinting in PHP if it precedes a function declaration.

EasyMotion

⌘ + **;**, **character** Places labels on the character you typed.
Type the corresponding label-character to move the cursor to that position.

Emmet

remapped **ctrl** + **X** Expand abbreviation (e.g. `ul>li.listitem*6>a`)
p, **2**, **0**, **→** expands to **padding: 20px**
f, **z**, **→** expands to **font-size:**

PlainTasks

Formats your TODO files as checklists.
Appending a **:** to words (like so Front-end:) creates headers.
⌘ + **↩** Create a new task
⌘ + **D** Finish/unfinish a task
You can add tags with **@**

SFTP

Most of the explanations are directly copied from http://wbond.net/sublime_packages/sftp/usage

Remote Workflow

⌘ + **ctrl** + **U**, **⌘** + **ctrl** + **F** Upload the current file
⌘ + **ctrl** + **U**, **⌘** + **ctrl** + **C** Upload changed files since last commit
⌘ + **ctrl** + **U**, **⌘** + **ctrl** + **N** Upload open files
⌘ + **ctrl** + **U**, **⌘** + **ctrl** + **O** Download the remote version of the selected file and overwrite the local copy
⌘ + **ctrl** + **U**, **⌘** + **ctrl** + **R** Upload the entire folder the current file is located in
⌘ + **ctrl** + **U**, **⌘** + **ctrl** + **E** Download the entire folder the current file is located in
⌘ + **ctrl** + **U**, **⌘** + **ctrl** + **I** Download the remote version of a file to a temp location and diff it with the local version
⌘ + **ctrl** + **U**, **⌘** + **ctrl** + **Y** Compare file modification times and confirm actions before uploading the selected file or

folder. This will also delete files off of the remote server that do not exist locally.
⌘ + **ctrl** + **U**, **⌘** + **ctrl** + **D** Compare file modification times and confirm actions before downloading the selected file or folder. This will also delete files off of the local machine that do not exist remotely.
⌘ + **ctrl** + **U**, **⌘** + **ctrl** + **B** Compare file modification times and confirm actions before uploading/downloading the selected file or folder. This will never delete files, and will always perform the action that causes the newest file to be present in both locations.
⌘ + **ctrl** + **U**, **⌘** + **ctrl** + **M** Watch the file for modifications (from Sublime or other applications). When the file modification time changes, the file will be uploaded.
⌘ + **ctrl** + **U**, **⌘** + **ctrl** + **W** Open the server quick panel browser at the remote folder corresponding to the selected file or folder.

Server Workflow

⌘ + **ctrl** + **R**, **⌘** + **ctrl** + **S** Setup a new server.
⌘ + **ctrl** + **R**, **⌘** + **ctrl** + **B** List the servers, with an option to setup a new one.
⌘ + **ctrl** + **R**, **⌘** + **ctrl** + **N** Show the current directory listing for the last used server.
⌘ + **ctrl** + **R**, **⌘** + **ctrl** + **E** List the servers for the purpose of editing.
⌘ + **ctrl** + **R**, **⌘** + **ctrl** + **D** List the servers for the purpose of deletion.

Both Workflows

⌘ + **ctrl** + **U**, **⌘** + **ctrl** + **S** Show the SFTP activity panel
⌘ + **ctrl** + **U**, **⌘** + **ctrl** + **X** Stop the current SFTP/FTP server activity (connection, upload or download)
