

# Sublime Text Cheatsheet (Mac)

Version 1.2, updated May 20, 2013

## General

⌘ + ⬆ + P Command Palette  
⌘ + P Goto Anything  
⌘ + R Goto Symbol  
⌘ + N New File  
⌘ + S Save File  
⌘ + ⬆ + S Save File As  
⌘ + ⇧ + S Save All  
⌘ + O Open File  
⌘ + W Close File  
⌘ + ⬆ + T Reopen Closed File  
⌘ + ⬆ + N New Window  
⌘ + ⬆ + W Close Window  
⌘ + K, ⌘ + B Show Sidebar  
ctrl + ` Show Console  
⌘ + ctrl + F Enter Full Screen  
⌘ + ctrl + ⬆ + F Enter Distraction Free Mode

## Moving/editing

⌘ + Z Undo  
⌘ + ⬆ + Z Redo  
⌘ + Y Repeat  
⌘ + C Copy  
ctrl + Y Yank (inserts the text that's on top of the kill ring)  
⌘ + X Cut  
⌘ + V Paste  
⌘ + ⬆ + V Paste and Indent  
⌘ + J Indent  
⌘ + [ Unindent  
⌘ + ctrl + ⬆ / ⬇ Swap Line Up/Down  
⌘ + ⬆ + D Duplicate Line  
ctrl + ⬆ + K Delete (kill) Line  
⌘ + J Join Lines  
⌘ + / Toggle Comment  
⌘ + ⇧ + / Toggle Block Comment  
⌘ + ⬆ + ↵ Insert Line Before  
⌘ + ↵ Insert Line After  
⌘ + ⬅ Delete to Beginning of Line  
ctrl + K Delete to End of Line  
ctrl + A Move to Beginning of Line  
ctrl + E Move to End of Line  
ctrl + P (revious) Move Up  
ctrl + F (orward) Move Right  
ctrl + N (ext) Move Down  
ctrl + B (ack) Move Left  
ctrl + T Transpose (swap two characters or words; buggy behaviour)  
⌘ + ⇧ + . Close Tag  
ctrl + ⬆ + W Wrap Selection with Tag  
⌘ + K, ⌘ + U Convert Selected Text to Uppercase  
⌘ + K, ⌘ + L Convert Selected Text to Lowercase  
⌘ + ⇧ + Q Wrap Paragraph at Ruler

F5 Sort Lines  
F5 Sort Lines (Case Sensitive)  
ctrl + G Goto Line  
ctrl + M Jump to Matching Brackets (does not work with HTML/XML tags)  
ctrl + L Scroll to Selection (centers the screen to cursor)  
ctrl + ⇧ + ⬆ / ⬇ Scroll Line Up/Down  
ctrl + Q Record Macro  
ctrl + ⬆ + Q Playback Macro

## Selection

⌘ + U Undo  
⌘ + ⬆ + U Soft Redo  
⌘ + ⬆ + L Split Selection Into Lines (inserts multiple cursors)  
ctrl + ⬆ + ⬆ / ⬇ Add Previous/Next Line (inserts multiple cursors)  
⌘ Single Selection (when there are multiple selections; exits to visual mode first if you are in insert mode)  
⌘ + A Select All  
⌘ + D Expand Selection to Word  
⌘ + L Expand Selection to Line  
⌘ + ⬆ + A Expand Selection to Tag (HTML/XML)  
⌘ + ⬆ + ⇧ Expand Selection to Scope  
ctrl + ⬆ + M Expand Selection to Brackets  
⌘ + ⬆ + J Expand Selection to Indentation

## Search/replace

⌘ + F Find  
⌘ + G Find Next  
⌘ + ⬆ + G Find Previous  
⌘ + I Incremental Find  
⌘ + ⇧ + F Replace  
⌘ + ⇧ + E Replace Next  
⌘ + ⇧ + G Quick Find (searches for the word under the cursor)  
⌘ + ctrl + G Quick Find All (selects all occurrences of the word under the cursor)  
⌘ + E Use Selection for Find  
⌘ + ⬆ + E Use Selection for Replace  
⌘ + ⬆ + F Find in Files (all open files)  
F4 Next Result (file search results)  
⬆ + F4 Previous Result (file search results)

## Folding

⌘ + ⇧ + [ Fold (selection)  
⌘ + ⇧ + ] Unfold  
⌘ + K, ⌘ + J Unfold All  
⌘ + K, ⌘ + 1 Fold All  
⌘ + K, ⌘ + 2-9 Fold Level 2-9  
⌘ + K, ⌘ + T Fold Tag Attributes (HTML/XML)

## Bookmarking

⌘ + K, ⌘ + ⇧ Set Mark  
⌘ + K, ⌘ + A Select to Mark  
⌘ + K, ⌘ + W Delete to Mark

⌘ + K, ⌘ + X Swap with Mark  
⌘ + K, ⌘ + G Clear to Mark  
⌘ + F2 Toggle Bookmark  
F2 Next Bookmark  
⬆ + F2 Previous Bookmark  
⌘ + ⬆ + F2 Clear Bookmarks

## Miscellaneous

F6 Toggle Spell Check  
ctrl + F6 Next Misspelling  
ctrl + ⬆ + F6 Previous Misspelling  
⌘ + B Build  
ctrl + ⇧ Show Completions  
⌘ + ⇧ + T Special Characters

## Vintage Mode

Most basic vim commands should work (command mode only obviously) and can be preceded with a count.

. Repeat  
d, [count] (optional), [motion]/dd/[D] Delete motion (e.g. a word) or delete line or delete line to end  
c, [count] (optional), [motion]/C Change motion or change until end of line (enters insert mode)  
y, [count] (optional), [motion]/yy Yank motion or yank (copy) Line  
p/[P] Paste yanked/deleted text after/before the cursor  
O/[O] Move to the beginning/end of a line  
g Most of [g]'s power is not implemented in Vintage Mode. You can use the basic combinations [gg] and [G] to move to the top/bottom of the file. [number], [gg] to move to that line. [ga] to display character encoding in the status bar.  
a/[A] Append to cursor/line (enters insert mode)  
i/[I] Insert before cursor/line (enters insert mode)  
w/[W] Move forward a Word/WORD (WORDS are whitespace-separated words)  
b/[B] Move backwards a Word/WORD  
e/[E] Move to the end of a Word/WORD  
f, [character]/[F], [character] Find (character) forward/backwards on the current line  
r, [character] Replace character under cursor  
t/[T] 'till (forward/backward) Used in combination with motions like [c] or [d]. For example, [d], [t], [{ deletes everything until the next { character (on the current line).  
o/[O] Open line below/above (enters insert mode)  
{/[}] Move to the beginning/end of a paragraph  
s/[S] or [cc] Substitute character/line (enters insert mode)  
H(igh)/M(id)/L(ow) Move cursor to the top/middle/bottom of the screen  
J Join Lines  
ZZ Close File  
x Delete character under cursor  
X Backspace  
v/[V] Enters Visual Mode/Visual Line Mode  
n/[N] Find next/previous occurrence of search  
>, [>]/<, [<] Indent/Unindent  
~ Swap Case  
q, [character]/[@], [character] Record/play macro

## Remapped commands

**ctrl** + **S** Show Sidebar  
**⌘** + **ctrl** + **M** Toggle Minimap  
**⌘** + **ctrl** + **K** Swap Line Up  
**⌘** + **ctrl** + **J** Swap Line Down  
**⌘** + **↑** + **K** Delete (kill) Line

## Plug-ins

### AdvancedNewFile

**⌘** + **⌘** + **N** New file from file/project directory (you can autocomplete directories)  
**⌘** + **↑** + **⌘** + **N** New file from file/project directory (adds an `__init__.py` file to each directory created)

### Alignment

**⌘** + **ctrl** + **A** Aligns a multi-line selection to indentation or a "=" character

### Alternative Autocompletion

**remapped** **ctrl** + **↑** + **H** Previous autocompletion  
**remapped** **ctrl** + **↑** + **K** Next autocompletion

### ColorPicker

**⌘** + **↑** + **C** Pops up a color picker and, after picking a color, inserts a hexcode

### DashDoc

**ctrl** + **H** Uses the current selection to search in Dash[1]

### DocBlockr

**/**, **\***, **\***, **↩** or **/**, **\***, **↩** Creates a comment block.  
Provides type hinting in PHP if it precedes a function declaration.

## EasyMotion

**⌘** + **;**, **character** Places labels on the character you typed.  
Type the corresponding label-character to move the cursor to that position.

## Emmet

**remapped** **ctrl** + **X** Expand abbreviation (e.g. `ul>li.listitem*6>a`)  
**p**, **2**, **0**, **→** expands to **padding: 20px**  
**f**, **z**, **→** expands to **font-size:**

## PlainTasks

Formats your TODO files as checklists.  
Appending a **:** to words (like so Front-end:) creates headers.  
**⌘** + **↩** Create a new task  
**⌘** + **D** Finish/unfinish a task  
You can add tags with **@**

## SFTP

Most of the explanations are directly copied from [http://wbond.net/sublime\\_packages/sftp/usage](http://wbond.net/sublime_packages/sftp/usage)

### Remote Workflow

**⌘** + **ctrl** + **U**, **⌘** + **ctrl** + **F** Upload the current file  
**⌘** + **ctrl** + **U**, **⌘** + **ctrl** + **C** Upload changed files since last commit  
**⌘** + **ctrl** + **U**, **⌘** + **ctrl** + **N** Upload open files  
**⌘** + **ctrl** + **U**, **⌘** + **ctrl** + **O** Download the remote version of the selected file and overwrite the local copy  
**⌘** + **ctrl** + **U**, **⌘** + **ctrl** + **R** Upload the entire folder the current file is located in  
**⌘** + **ctrl** + **U**, **⌘** + **ctrl** + **E** Download the entire folder the current file is located in  
**⌘** + **ctrl** + **U**, **⌘** + **ctrl** + **I** Download the remote version of a file to a temp location and diff it with the local version  
**⌘** + **ctrl** + **U**, **⌘** + **ctrl** + **Y** Compare file modification times and confirm actions before uploading the selected file or

folder. This will also delete files off of the remote server that do not exist locally.  
**⌘** + **ctrl** + **U**, **⌘** + **ctrl** + **D** Compare file modification times and confirm actions before downloading the selected file or folder. This will also delete files off of the local machine that do not exist remotely.  
**⌘** + **ctrl** + **U**, **⌘** + **ctrl** + **B** Compare file modification times and confirm actions before uploading/downloading the selected file or folder. This will never delete files, and will always perform the action that causes the newest file to be present in both locations.  
**⌘** + **ctrl** + **U**, **⌘** + **ctrl** + **M** Watch the file for modifications (from Sublime or other applications). When the file modification time changes, the file will be uploaded.  
**⌘** + **ctrl** + **U**, **⌘** + **ctrl** + **W** Open the server quick panel browser at the remote folder corresponding to the selected file or folder.

### Server Workflow

**⌘** + **ctrl** + **R**, **⌘** + **ctrl** + **S** Setup a new server.  
**⌘** + **ctrl** + **R**, **⌘** + **ctrl** + **B** List the servers, with an option to setup a new one.  
**⌘** + **ctrl** + **R**, **⌘** + **ctrl** + **N** Show the current directory listing for the last used server.  
**⌘** + **ctrl** + **R**, **⌘** + **ctrl** + **E** List the servers for the purpose of editing.  
**⌘** + **ctrl** + **R**, **⌘** + **ctrl** + **D** List the servers for the purpose of deletion.

### Both Workflows

**⌘** + **ctrl** + **U**, **⌘** + **ctrl** + **S** Show the SFTP activity panel  
**⌘** + **ctrl** + **U**, **⌘** + **ctrl** + **X** Stop the current SFTP/FTP server activity (connection, upload or download)
